

# ION CHROMATOGRAPHY

---

MANUFACTURER : Dionex

MODEL : DX-600

---

## Specifications

- Possible analytes: anions (acetate, bromide, chloride, fluoride, nitrite, nitrate, oxalate, phosphate, sulphate, sulphite) and cations (ammonium, calcium, magnesium, potassium, sodium,...).
- Ionic contamination testing on individual parts, complete assemblies or small devices
- Available detectors: absorbance, conductivity and electrochemical
- Autosampler holding >50 vials (5 mL)

## Application

- Anions and cations analysis in various matrixes (water, flux...)
