

30 LITERS REACTOR

MANUFACTURER : -

MODEL : -

Applications

- Synthesis of chemical products.
- Adapted for the synthesis of very viscous materials.

Characteristics

- Maximum temperature : 300°C
- Heating by heating baffle
- Automated cooling system with water-cooled cooling coil
- Mechanical agitation with two propellers
- Reflux / distillation available
- Possibility of a metal stirrer for viscous products
- Toggles to empty viscous products
