

BET POROSIMETRY

MANUFACTURER : Quantachrome

MODEL : Autosorb-1

Analysis

- Measurement of specific surface area (m^2/g)
- Measurement of pore distribution (\AA)

Characteritics

- Adsorbant : N_2 and Ar
- Analysis of solid samples
- Necessary sample quantity: between 100 mg and 5 g
- Sample size: 12 mm maximum
- Split analysis instrument allows the characterization of sample series at twice the normal rate
