

FOURIER TRANSFORM INFRARED SPECTROSCOPY (FTIR)

MANUFACTURER : Bio-Rad

MODEL : FTS6000

Analysis

- Identification of organic and inorganic chemicals, determination of structure
- Quantitative, qualitative and semi-quantitative analysis
- Sampled depth: 0.1 to 10 μm
- Applications: measurements PM-IRRAS, PAS, depth profiling
- Equipped with a “step-scan” module

Applications

- Measurements PM-IRRAS, PAS, depth profiling
